CHYMICAL MEDICAMENTS,

BEING A

CATALOGUE

OF

Medicines carefully and exactly prepared

BY

JOHN CASIMIR,

GERMAN CHYMIST & PHYSITIAN.

IN WHICH ALSO

The moſt predominant and reigning Diſeaſes and Diſtempers afflicting Humane Nature in this Age, are briefly hinted at; together with their Cure by appropriated and adapted Medicines, wherein the Author, (through the Bleſſing of God upon his Endeavours) hath been very Succeſsful: and thoſe Remedies which by long Practice and Experience, he hath found both ſafe and effectual in reſtoring languiſhing and afflicted Nature, he hath here publiſhed for the good of all.

The following Chymical Medicaments and Preparations may be had at the Author's Houſe

In *Grace-Church-ſtreet*, *Nagshead-Court*, at the Sign of the *Three Golden Keys* near *Lumbard-ſtreet*, where any may be furniſhed with what Quantities they pleaſe, eſpecially thoſe who make great Voyages, they being ſuch as will keep their Vertues throughout all Climes and parts of the Word, being proper for Prevention as well as Cure.

London, Printed by *John Bringhurſt*, for the Author, 1682.

TO ALL INGENIOUS WELL-WISHERS TO THE PRACTICK-PART OF PHYSICK.

AS the Diſeaſes and Diſtempers incident to Humane Nature are many and grievous, ſuch is the favour of God granted unto us by the indulging hand of his Providence, that he hath largely contributed to its comfort herein, whereby we are furniſhed with Means or Remedies, with his Bleſſing to remove the ſame. And he hath alſo decreed, bounteous Nature ſhould not be wanting to us therein. Wherefore what God hath communicated unto us in this Science, either by information from Himſelf, or by Experience in the Practick Part of Phyſick, I hereby publiſh for the benefit of the Sick the following Medicaments, being alſo prepared with that Care which Art and Nature do require.

This Choice and Noble Preparation is added here as a Seal to all the reſt as being a great help for renewing and reſtoring of Languiſhing Nature.

AS the preceeding Catalogue informs of ſome ſublime, and other the moſt uſeful Chymical Preparations; be pleaſed to receive this further information concerning ſome eminent and particular Cures, whereby the Diſtempers following may be deprived of that advantage they otherwiſe might arrive at.

I. *Of the Scurvy.*

The Eminently Afflicting Diſtemper of this Land radically conſidered, the Learned acquieſce herein, that it is an ill habit of the body, or a diſproportion of Humours, commonly called the Scurvy,

whoſe hoſtile quality aſſaults nothing leſs than the pureſt part of the blood, whence a putrefaction thereof enſues, and conſequently an Abridgement of Life, even in Infancy, if a timely Remedy be not found. Wherefore in any Sex or Age or at any ſeaſon of the Year, in *England*, *Holland*, or *America*, let our Anti-ſcorbutick Medicins be known, and eſteemed as true Specificks, which with much eaſe preſerve from, and Cure the Scurvy.

The Symptoms of the Scurvy in the Phlegmatick and Melancholick are

Ill digeſtion of food, extream cold and dulneſs of head, ſhortneſs and difficulty of breathing, weakneſs in the back, pain in the Limbs, more eſpecially in the knees and joynts of the Arms, ſwelling in the Legs and Stomach, botches and breakings forth of the Body, with a heavineſs of the whole, and great aptneſs to ſleep.

For Cure of theſe, Uſe

Spiritus Cochleareæ	*Spirit of Scurvygraſs*
Pilulæ Regales	*Royal Pills*
Eſſentia Stomachica	*Stomach Eſſence*
Pill. Polychreſt.	*Pills of great Uſe.*

Symptoms of the Scurvy in the Sanguin and Cholerick.

Great Drought, and inveterate Head-ach, pains in the ſides, inflammations, eſpecially in the Legs and Face, dizzineſs in the Head, and great unaptneſs to ſleep, alſo impoſtumes, and riſings in ſeveral parts of the body, which are Cured with

Elixir Cochleareæ	*Elixir of Scurvygraſs*
Pilulæ Regales	*Royal Pills*
Spiritus Adjuvans.	*Helping Drops.*

Deſcending to particulars we begin with the Head, and Medicines conducing to the Cure thereof.

II. *Diſeaſes of the Head.*

The Head is a noble yet tender part of the Body, and is often weakned by Diſtempers incident thereunto, which are ſufficiently known to the Patient, by the pain and ſtupidity they expoſe him to, and to us by Symptoms, Names or Terms appropriate, as *Impoſtumes*,

poſtumes, Convulſions, Apoplexies, Vertigo, Megrim, Lethargy, Falling Sickneſs, Palſy, &c. In order to the Curing whereof we have ſucceſsfully uſed and do recommend

Elixir Sulphuris Vitrioli	*Elixir with the Sulphur Vitriol*
Pilulæ Polychreſt.	*Pills of great Uſe*
Spiritus Cephalicus	*Drops to ſtrengthen the Head*
Aqua Ophthalmica	*Eye Water*
Pilulæ Francofortenſes.	*Francfort Pills.*

III. *Diſeaſes afflicting the Neck and Throat.*

Some are afflicted with *Inflammations*, whence ariſe *Cancers* and *Ulcers*, others have hard tumors and ſwellings, called *Scrophulæ*, or the *Kings-Evil*, which fix themſelves there as much as in any part of the Body, and as much as moſt Enemies to Health.

For the Cure of which we recommend ſuch Medicinal Preparations as the nature of the grief requires wholly to extinguiſh both the Diſeaſes and its Symptoms, as are

Piluæ Polychreſtæ	*Pills of great Uſe*
Pilulæ Cæruleæ	*Blew Pills*
Pulvis Reſolutivus	*Reſolving Powder*
Tinctura digeſtiva	*Digeſtive Tincture*
Elixir Cochleareæ	*Elixir of Scurvy-graſs*
Linimentum Vitrioli.	*Liniment of Vitriol.*

IV. *For the Stomach.*

A weak or foul Stomach if the humors annoying it be not evacuated or corrected, it not only is diſabled to convert food into good nouriſhment, but on the contrary corrupts what ſhould nouriſh, and turns it into an unprofitable maſs, whereby the Body ſuffers, and many diſtempers follow, which may be prevented or remedied by the Uſe of ſuch Medicines as are particularly adapted to remove the evil, and ſettle or eſtabliſh the good order thereof, *viz.*

Pilulæ *S*pecies (Salutaris)	*Species Pills*
Pills Polychreſt.	*Pills of great Uſe*
Eſſentia Stomachica	*Stomach Eſſence*
Aqua Diaphoretica	*Sudorifick Water*
Acetum Antimonii	*Vinegar of Antimony*
Gas Sulphuris.	*Ens Primum.*

V. *For the Breaſt and Lungs.*

The diſtempers and afflictions of which are inveterate Coughs, Catarrhs, Aſtmahs, Conſumptions, cauſed by a flux of Humors or rheumatick diſtillations on the Lungs; attended with ſhortneſs of breath, want of appetite, and many other infirmities, which ſo impaireth the Body, that no part thereof enjoyeth the function, nature hath ordained it for: to cure which we commend ſuch Medicines as are truly renovating and effectually reſtoring the Patients with eaſe, *viz.*

Balſam. Sulph. Communis	*Balſom of Sulphur, common*
Extractum Sulphuris	*Extract of Sulphur*
Pilulæ pectorales	*Pectoral Pills*
Spiritus Adjuvans	*Helping Drops*
Acetum Antimonii	*Vinegar of Antimony*
Gas Sulphuris	*Ens primum*
Remedium Principis.	*Princes Drops.*

VI. *For the Heart.*

The profoundeſt Students in Nature, and Spagyrical Science in all Ages, eſteem'd it their duty to regard the Heart as the ſeat of Life, nor would I appear to have any other than a venerable eſteem of this Aphoriſm, and to tender both the Fabrick and Life of Man, as the workmanſhip and delight of the great Creator. In order whereunto as it hath pleaſed him to place me, where I might be ſerviceable to them, ſo have I made it my ſtudy to be faithful herein, and by the ſame hand have been conveyed unto me ſuch ſelect cordial Medicines, as are neceſſary to fortifie the Heart, and to withſtand or overcome the afflicting pains of it; ſuch as are

Tinctura Lilii	*Tincture of Lilly*
Elixir Vitæ	*Elixir of Life*
Eſſentia Croci	*Eſſence of Saffron*
Spiritus adjuvans	*Helping Spirit*
Tinctura Solis	*Tincture of Gold*
Aurum Potabile.	*Potable Gold.*

VII. *Obſtructions of the Liver and weakneſs of the Spleen.*

The Liver being the fountain or ſpring of the little Rivers or Veins of the *Microcoſme*, if this be obſtructed or hindred in its office, the other parts of the body languiſh and complain thereof, whence dangerous diſeaſes are threatned. The Spleen alſo when it is beſet and overcharged with ill juyces commonly called humors, it is afflicted and ſtirs up the paſſion thereof, afflicts the vitals, oppreſſeth the Spirits, and fiills the Body with vapors and melancholy fits, and annoys the head with dizzineſs and other afflictions, which are ſo many, that for brevity ſake we omit them: however we have Medicines if not *Arcanums*, that powerfully tend to reconcile the diſcord in Nature, which ariſeth on that account, *viz.*

Pilulæ Lunares	*Lunar Pills*
Pilulæ Polychreſt.	*Pills of great Uſe*
Pilulæ Regales	*Royal Pills*
Elixer Cochleareæ	*Elixir of Scurvy-graſs*
Tinctura Tartari	*Tincture of Tartar*
Tinctura Aurata	*Golden Tincture*
Sal Martis.	*Salt of Mars.*

VIII. *For the Bowels and Belly.*

Theſe parts of the Body are alſo often afflicted, as with Gripings, Excoriations, Bloody-flux, Colick, Iliack-paſſion, and other violent painr, for which there are ſpecial Remedies found to reſtore them (with Gods Bleſſing) to their natural and ordained eaſe, *viz.*

Bezoardicum Metallicum	*Metalline Bezoar*
Species Salutaris	*Species Powder*
Elixir Salutis	*Elixir of Health*
Elixir Juniperinum	*Elixir of Juniper-berries*
Aurum Potabile	*Potable Gold*
Pilulæ Regalis	*Pills Royal.*

IX. *For the Stone, Gravel of the Kidneys and Stoppage of Urine, alſo weakneſs of the Back.*

The Stone and Gravel by their extremity of pain, have expoſed many Patients to great Travail and Expence to ſeek a Remedy, and when they fall into the hand of ſuch as attempt the Cure by way of cutting,

cutting, it often misseth its desired end, to the Patients grief, and sadning of their Friends. But the Medicines we give are not only safe, but effectual in dissolving, or wasting gradually the hardned matter, to the Comfort of the Patient, as may be experienced in the following Medicines.

Spiritus Nitri dulcis	*Spirit of Nitre dulcified*
Pulvis Lithontripticus	*Stone Powder*
Elixir Salutis	*Elixir of Health*
Sal Succini	*Salt of Amber*
Aqua Nephritica.	*Nephritick Water.*

X. *For the Gout and Sciatica.*

The Gout is attended with pains so violent, that those that feel them think it impossible to express the sense thereof, to speak nothing of the long continuance of the same with some, which at last ushers them to the Shades, yet for this rooted greif is also a Balm afforded, *viz.*

Tinctura Digestiva	*Digestive Tincture*
Aqua Diaphoretica	*Sudorifick Water*
Pilulæ Antipodagricæ	*Gout Pills*
Pil. Polychrest.	*Pills of great Use*
Balsam. Animalis	*Animal Balsom*
Ol. Butleri.	Butler's *Oyle.*

XI. *Surfeits.*

Surfeits either of heat or cold, eating or drinking any thing noxious to the Stomach, are incident to most Complexions and Ages, which often bring the strongest to that weakness, which terminates in the Grave. In this cause, without any offence to any, we are furnished with such Remedies as do recover with pleasure and ease. *viz.*

Elixir Vitæ	*Elixir of Life*
Pil. Polychrest.	*Pills of great Use.*
Pilulæ Regales	*Pills Royal*
Essentia Stomachica	*Stomach Essence*
Species Salutaris.	*Species Powder.*

XII. *Impostumes and Pleurisies.*

Impostumes proceed from an indisposition of the blood, and thereby become Chronical, or from accident and then they are acute, as in the Pleuresie, which often assaults the Life with such violence, as puts

puts the Patient in danger of a ſpeedy death, to prevent which we recommend

Spiritus Adjuvans	*Helping Drops*
Pilulæ Regales	*Royal Pills*
Pil. Polychreſt.	*Pills of great Uſe*
Unguentum Diaphoreticum	*Diaphoretick Oyntment*
Emplaſtrum Aureum	*Golden or Stitch Plaiſter.*
Specif. Digeſtiv. cum Aq. Regin. Hung. Tinctura Digeſtiva	*Digeſtive Tincture*
Aqua Regin. Hungariæ.	*Queen of Hungaries water.*

XIII. *Feavers and Small Pox.*

Feavers are no leſs than a paſſion of the blood, which hath often boldly challenged the Phyſitian, by afflicting his Patient, to allay the fury and rage thereof. In this caſe we adviſe the region of the Stomach to be anointed with our Diaphoretick Balſom, then take

Spirit. Adjuvans	*Helping Drops*
Pulvis Bezoardicus	*Bezoartick Powder*
Circulatum Medium.	*Middle Circulate.*

XIV. *Small-Pox.*

When the Small Pox are attended with a kind of Malignant Feaver, be the Patient young or old uſe the Diaphoretick Balſom to the Stomack, as alſo to the Reins of the Back, and the ſide too, in caſe there be any pain there, which will ſoon procure eaſe and bring out the Small Pox, which being out, and any one of the following Medicines being adminiſtred, the Sick will find the benefit, and the Obſerver ſatisfied.

Pil. Polychreſt.	*Pills of great Uſe*
Spiritus Adjuvans	*Helping Drops*
Tinctura Solis	*Tincture of Gold*
Aurum Potabile.	*Potable Gold.*

XV. *Tertian or quartan Agues.*

The Cauſe of Agues is in Man, it being a Creation of his own, a Chaos, made up of paſſion and fear, by which a matter is contracted, into which a particular ſpirit enters, of a violent nature, by the continuance of which other diſeaſes are contracted according to the habit of the body, which daily grows weaker, becauſe of the continual aſſaults of Life, which at laſt unwillingly yields to leave its habita-

tion: to prevent which the vital ſpirit is to be aſſiſted, and the accidents removed by ſuch experienced Medicins, to a perfection of the Cure, which hath been often performed in old and young, both Summer and Winter: ſuch are

Pil. Lunares	*Lunar Pilln*
Pil. Polychreſtæ	*Pills of great uſe*
Aq. Febrifuga	*Water againſt Agues*
Bezoard. Minerale	*Mineral Bezoar*
Pil. Regales	*Royal Pills*
Emplaſt. Febrifugum	*Ague Plaiſter*
Elixir Diaphoreticum.	*Sweat-cauſing Elixir.*

XVI. *Weakneſs of the Back.*

By reaſon of relaxation or fluxes, and other griefs, is the back often weakned, and weakneſs in that part of the Body is an inlet to many diſtempers, to prevent and reſtore which, we direct Medicines proper and effectual for the curing thereof, provided the Patient take firſt for three or four days after another of Antiſcorbutick Pills, and then

Pilulæ Roborantes	*Strengthening Pills*
Pilulæ Polychreſt.	*Pills of great uſe*
Extract. Specificum.	*Specifick Extract.*

XVII. *For the Dropſie.*

The Dropſie is a Diſtemper known to reduce the eſteemed and worthy Structure of Human Nature into an unprofitable Maſs, favouring neither the corpulent nor the ſlender. But our deſign here being chiefly to give a Catalogue of Medicines prepared, and not ſo much a Treatiſe of the Cauſe of Diſeaſes, our omiſſion thereof will be excuſable. Yet this we ſay, whilſt the Liver is obſtructed, the Reins defective, the Kidneys waſting, and weakneſs predominant, the event inevitably follows. But the means ordained for the Cure being carefully prepared, hath not returned without the deſired Succeſs, being in time carefully adminiſtred, ſuch Medicaments are

Pilulæ Lunares	*Lunar Pills*
Tinct. Cordialis	*Cordial Tincture*
Elixir Vitæ	*Elixir of Life*
Elixir Salutis	*Elixir of Health*
Pilulæ Polychreſt.	*Pills of great Uſe*
Extract. Hydrop.	*Extract againſt Dropſies*
Aurum Potabile.	*Potable Gold.*

XVIII. *For*

XVIII. *For the Palſie.*

The Palſie afflicts not only the Head, but taketh alſo poſſeſſion of other parts, to the debilitating and making uſeleſs, part of, if not the whole Body, if ſeaſonable adminiſtrations of reſtorative, vivifying and ſtrengthening Medicines be not procured, for the preventing and ſpeedy Cure of which, we recommend theſe following Medicines, by which many with the bleſſing of God have been reſtored to the activity and uſe of their Limbs.

Pilulæ Lunares	*Lunar Pills*
Pilulæ Regales	*Royal Pills*
Pilulæ Polychreſt.	*Pills of great Uſe*
Elixir Lavendulæ	*Elixir of Lavender*
Spiritus Adjuvans	*Helping Drops*
Aurum Potabile.	*Potable Gold.*

XIX. *Ruptures and Broken-Bellies.*

This infirmity often happens to many, either by violent exerciſe, as hard riding, ſuddain lifting or overſtreaching of the body, or from indiſpoſitions, as ventroſities and extream cold, when the body is reduced to impotency by continued and weakning afflictions. Thoſe that are bowed down and labour under the deviding violence thereof, are moſt ſenſible of the miſery they endure. Would to God they might be ſenſible of his Mercies herein, that puts me, as experienced in the effectual curing hereof, to publiſh the ſame for the content and ſatisfaction of many. And pleaſe to be informed, that to avoid prolixity, we delight not in the tedious commendations either of theſe or any other Medicinal Preparations: yet I doubt not that thoſe who ſhall have occaſion to uſe them, may find the benefit thereof, in a far higher degree of Service, than I commend them.

Pilulæ Regales	*Royal Pills*
Pilulæ Roborantes	*Strengthening Pills*
Spirit. Adjuvans	*Helping Drops*
Unguent. Primum	*Firſt Ointment*
Unguent. Secundum	*Second Ointment*
Emplaſtrum Tertium.	*Third Plaiſter.*

XX. *Fiſtula's and ſtubborn Ulcers.*

Fiſtula's when once ſetled have always been difficult to remove, the humors which cauſe it being ſo corroding and fretting, that it forceth a current where Nature never intended it, and that often near the Eye, a place for its tenderneſs very remarkable, as well as in other parts of the body, for which we are ſtored with excellent Balm and Specifick Remedies appropriated to the ſeveral members, whereſoever they happen to fix themſelves, as

Aqua Diaphoretica	*Sudorifick Water*
Pilulæ Ceruleæ	*Blew Pills*
Pilulæ Regales	*Royal Pills*
Extract. Animale	*Animal Extract*
Extract. Vegetabile	*Vegetable Extract*
Pilulæ Polychreſtæ	*Pills of great Uſe.*

XXI. *Leproſie and Tetters.*

No doubt but thoſe who are troubled with this Evil, would be glad to be clear of it, for nature allows as little of deformity as pain: neither can theſe diſeaſes be ſaid to be without pain, for they are numbred among the Enemies of Life. However effectual Remedies are here preſcribed for the rooting of them out, as alſo for preſerving the inward parts from being hurt thereby, and conſequently from the danger that would enſue: for the Cure of theſe make uſe of

Aqua Diaphoretica	*Sudorifick Water*
Pilulæ Ceruleæ	*Blew Pills*
Extract. Animale	*Animal Extract*
Tinctura Digeſtiva	*Digeſtive Tincture*
Unguent. Flavum.	*Yellow Oyntment.*

XXII. *Sore Breaſts and Cancers.*

The Breaſts and Paps are known to be very tender parts, and ſubject to many griefs, which ſome have found mortal, others given over as incurable, eſpecially in Cancers. To be ſilent in what God hath diſcovered to us herein, were to obſcure a Bleſſing many might deſire, and in a modeſt ſenſe have right to enjoy. Is there not a

Balm

Balm ordained for the afflictions of any part of the Body ? Except we prove ungrateful to God and unjuſt to our ſelves, we cannot plead ignorance, as to the order and manner to the aforeſaid griefs, in any part of the Body, whilſt they are yet growing, for ſeveral have found the certainty of it to their comfort and our Satisfaction, the Medicines are

Pilulæ Polychreſt.	*Pills of great Uſe*
Extract. Animale	*Animal Extract*
Mercur. Diaphoreticus	*Mercury cauſing Sweat*
Elixir Cochleareæ	*Elixir of Scurvy-graſs*
Ens Veneris	*Ens of Venus*
Oleum Butleri	Butler's *Oyl*
Pilulæ Gallicæ.	*Gallican Pills.*

XXIII. *Barrenneſs.*

Barrenneſs may not juſtly be attributed to Nature, for Nature was ordained to bear and bring forth, and therefore rarely nouriſheth any thing that oppoſeth her courſe herein: nevertheleſs accidents often prevail againſt Nature, whence obſtructions proceed, and unnatural conſequences do follow. But having by Gods permiſſion contemplated the ſtate of things that are, I took Liberty to write of this Subject, ſeeing that many in a married ſtate, who might have expected to bear Children, have proved Barren; and know this to be a certain Truth, that unnatural defects and obſtructions may by a Divine Bleſſing on *Phyſical Means* be effectually removed, and Nature reſtored to enjoy its decreed and ultimate end or honour. Whence know that our conſideration and ſtudies herein for Medicines, have plentifully furniſhed us to the certain content and ſatisfaction of many. Which follow:

Elixir Cordiale	*Cordial Elixir*
Pilulæ Polychreſt.	*Pills of great Uſe*
Tinct. Corallorum	*Tincture of Coralls*
Tinct. Solis	*Tincture of Gold*
Aurum Potabile.	*Potable Gold.*

XXIV. *Of Children and Rickets.*

The Tenderneſs of the Antients towards Children in the time of breeding their Teeth, extended to careful ſearch of ſuch means as might contribute to their Eaſe and Relief in the Extremity and Violence thereof, the Knowledge of which we Promote and Eſteem, having found profitable,

Manila	*Necklaces*
Pilulæ Polychreſt.	*Pills of great Uſe*
Tinct. Antimonii	*Tincture of Antimony*
Aurum Potabile	*Potable Gold*
Extractum Catholicum	*Univerſal Extract*
Remedium Principis.	*Princes Drops.*

Beſides the fore-recited Maladies, there is one more which thoſe that are afflicted with, never deſire to poſſeſs one year, much leſs to Entail it on their Poſterity; the malignity whereof infects the Bones that flouriſh with Marrow, and the Breaſts that flow with Milk, fills the Body with Wounds, unnatural Sores and Putrefactions, but before it arrive to ſuch an exalted degree of danger, it is attended with Syptoms of leſs Note, ſufficiently known not to be repeated here.

The Cure whereof in that regular way as Nature requires, we moſt approve and eſteem of, which is carefully practiſed by us, whereby to rectifie the great indiſpoſition of the Body, and to recover the corrupted maſs of the blood to health, in order to which make uſe of

The Concluſion.

Other Diſeaſes, Sickneſſes and Infirmities not mentioned here were omitted for Convenience ſake, and not of neglect, or for want of a due conſideration of the Cauſe and Cure thereof: but we would eſteem the Opinion of the Antients in this matter, whoſe Labour and Care was undoubtedly great, both to preſerve and recover health, as their large Volumes extant witneſs for them; as alſo to honour this Worthy, Princely and Antient if not Sacred Science, and would not ſo much as have the terms thereof proſtituted to every uncultivated mind, but with Gravity, commended and admired as the neceſſary means to enjoy Health, during the time of our Pilgrimage or ſojourning here: whereby, if the Divine Power permit, we may arrive to a full Age, which was in days paſt accounted a great Bleſſing.

The Fear of the Lord prolongeth Life; for of the Moſt High cometh Healing.
